TRAVELING TO ADVANCED NATURE POSITIVE AREAS

ONNA VILLAGE CREATION OF A CORAL VILLAGE TOUR

An in depth guided tour on the red clay overflow environmental issue in Okinawa and initiative taken by Onna Village & OIST.

2024 **9/1** SUN

ONNA VILLAGE × OIST INITIATIVE

POINT 01

Program provided by specialized coordinators

The program is led by local expert coordinators with extensive on-site knowledge and OIST members. Through local fieldwork, discussions, and exchange, you can enjoy a variety of different cultures in the region.

POINT 02

Experience the futuristic facilities at OIST

At a cutting-edge research facility, we enjoy interacting across disciplines through lectures and discussions. Additionally, there is a unique landscape where futuristic building designs coexist with nature, which is also one of the highlights.

POINT 03

Participating in village development by giving back to the community

By participating in this tour, you will directly contribute to environmental measures, and your participation fee will be returned as income to local residents, which will improve the sustainability of each effort.

IN ORDER TO PRESERVE THE NATURAL ENVIRONMENT FOR

FUTURE GENERATIONS, WHAT WE SHOULD DO.

Onna Village in Okinawa is one of Japan's leading tourist resort areas, surrounded by a beautiful ocean with coral reefs.In Onna Village, industry, government, and academia are collaborating on various activities to address the red clay overflow environmental issue. This tour is a program where you can learn and practice such efforts in advanced Nature Positive areas and participate in village development.In addition to discovering the attractiveness of Okinawa's natural environment, this will be an opportunity to contribute to Nature-based Solutions (NbS).

LECTURE ON CREATING A CORAL VILLAGE IN ONNA VILLAGE ~Sustainable measures against red soil runoff~

Introducing the creation of the "Coral Village" in Onna Village and the land-based environmental conservation activity "Sustainable Red Soil Runoff Countermeasures." Explaining the "Honeycoral Project" and "Greenbelt Vetiver Secondary Use" as field work.

LECTURE & GROUP DISCUSSION

Seminar and discussion on benefits & impact of beekeeping as agricultural practice on existing ecosystems

Ryo Kirino

Onna Village Red Soil Runoff Prevention Regional Council Agricultural Environment Coordinator

MAJOR ACTIVITIES

2017: Appointed agricultural environment coordinator for the Onna Village Red Soil Runoff Prevention Regional Council

Nonno Hasegawa

Integrative Community Ecology Unit, Okinawa Institute of Science and Technology

MAJOR ACTIVITIES

2020 Start PhD program at Okinawa Institute of Science and Technology 2021 Honey bee viruses research seminar in Japan

>>>>>> OPTIONAL PROGRAMS(TBD) >>>>>>>>

VETIVER & BEEKEEPING TOUR

Vetiver planting & beekeeping tour

We will visit local farmers and observe farms that use vetiver grass to prevent red soil runoff. We will also observe beekeeping and sample freshly harvested honey.

*In case of rain, we have other programs planned

FIELD WORK

Silt basin site visit

We will visit sedimentation ponds designed to prevent red soil from flowing directly into the sea, and observe the accumulation of red soil and the habitat conditions of foreign species

*In case of rain, we have other programs planned

VETIVER CRAFTS WORKSHOP Included in Program 01

In Onna Village, new industries and jobs are created through the commercialization of harvested vetiver. We will contribute to community development through a vetiver crafts workshop.

>>>>> LUNCH >>>>>

NAKAYUKUI MARKET

It is a market where various agricultural products and specialties from Okinawa are gathered. You can enjoy local food and buy souvenirs.
